

Cinnamon Nutrasorb®

Product Information

Cosmetic Applications

ANTI-INFLAMMATORY - ANTI-AGING - ANTI-OXIDANT - ANTI-MICROBIAL

Cinnamon Nutrasorb® is a proprietary and multifunctional protein-phytonutrient cosmetic ingredient with potent anti-oxidant, anti-inflammatory and anti-microbial properties that blends easily in anhydrous skin care, body care and lip care products. Cinnamon polyphenols applied to skin may also act as a prebiotic for beneficial skin microbes while suppressing harmful microorganisms that generate skin inflammation or other metabolic imbalances. Cinnamon polyphenols may thus naturally balance the immune and bacterial homeodynamics of the skin to promote health and beauty. Additionally, cinnamon proanthocyanidins are anti-oxidants that scavenge free radicals to provide UV protection and decrease the inflammatory response that contributes to skin aging and wrinkles.

Nutrasorb LLC develops and markets a broad range of proprietary, functionally-enhanced, high-quality ingredients with naturally concentrated, stabilized, and bioavailable phytoactives from fruits and vegetables produced with innovative Nutrasorb technology. Compared to conventional extracts, our polyphenol-protein complexes have greatly enhanced stability and bioavailability translating to greater efficacy from a smaller amount of phytoactives. Our nature-powered ingredients have broad applications in cosmetic, dietary supplement, and food products. With both nutritional and cosmetic applications, Nutrasorb technology and products promote beauty from within and externally when applied to skin.
