

Cinnamon Nutrasorb®

Product Information

Food & Supplement Applications

METABOLIC HEALTH - ANTI-INFLAMMATORY - IMMUNOPROTECTIVE - ANTI-MICROBIAL
ANTI-OXIDANT

Cinnamon Nutrasorb® is a multifunctional ingredient with enhanced health benefits made by naturally coating protein particles with cinnamon polyphenols. It can be incorporated into a variety of foods, dietary supplements, and cosmetic products. Cinnamon contains high levels of antioxidant polyphenols that support metabolic and cardiovascular health by promoting normal glucose, insulin, and lipid metabolism and reducing inflammation and cellular aging. Well documented health benefits of cinnamon polyphenols are amplified by Nutrasorb technology. In contrast to conventional extracts, proprietary polyphenol-protein complexes developed by Nutrasorb, protect and stabilize polyphenol molecules during manufacturing and inside human body, therefore greatly increasing their bioavailability and potency, reducing the effective dose and providing significant taste masking.

Nutrasorb LLC develops and markets a broad range of proprietary, functionally-enhanced and standardized ingredients with naturally concentrated, stabilized, and bioavailable phytoactives from fruits and vegetables produced with innovative and proprietary Nutrasorb technology. Our ingredients are developed by researchers from major US universities and are scientifically validated and quality controlled.
