

Green Tea Nutrasorb®

Product Information

Cosmetic Applications – Patent Pending

nutrasorb®
AN ADVANCED GENERATION OF
NATURE-POWERED PRODUCTS

ANTI-INFLAMMATORY - ANTI-AGING - ANTI-OXIDANT - CHEMOPROTECTION - UV PROTECTION

Green Tea Nutrasorb® is a proprietary, multifunctional cosmetic ingredient made by naturally coating protein particles with green tea polyphenols (e.g. catechins and epicatechins). It has anti-oxidant, anti-inflammatory and anti-microbial properties and blends easily in anhydrous skin care, body care and lip care products. Green tea polyphenols applied to skin inhibit cellular processes that contributes to skin aging and wrinkles and stimulate natural processes that lead to skin rejuvenation. They may also naturally balance the immune and bacterial homeodynamics of the skin to promote skin health. Additionally, green tea polyphenols are anti-oxidants that scavenge free radicals to provide UV protection and decrease the inflammatory response that contributes to skin aging and wrinkles.

Nutrasorb LLC develops and markets a broad range of proprietary, functionally-enhanced, high-quality ingredients with naturally concentrated, stabilized, and bioavailable phytoactives from fruits and vegetables produced with innovative Nutrasorb technology. Compared to conventional extracts, our polyphenol-protein complexes have greatly enhanced stability and bioavailability translating to greater efficacy from a smaller amount of phytoactives. Our nature-powered ingredients have broad applications in cosmetic, dietary supplement, and food products. With both nutritional and cosmetic applications, Nutrasorb technology and products promote beauty from within and externally when applied to skin.
